

ABOUT ME

Insight-driven and user-focused, with a background in research and a deep curiosity for what drives user behaviour. Skilled at uncovering core pain points and translating them into clear, actionable insights that shape product direction. Strong interest to contribute to strategic roles to create meaningful, user-centred experiences.

EXPERIENCE

Senior Product Manager at Shopee (Promoted from Associate, Jul 2026)

Sep 2024 – Present

Skills: Product strategy, ROI assessment, UX/UI design, AB Testing Strategy, Machine Learning Product Integration, Cost reduction, Competitor Study, Conversational AI, AI-Native Team

- Develop product solutions for the notification system that balance user experience with business impact, integrating UI/UX design, global feature controls, and A/B test strategies into comprehensive proposals
- Leverage SQL to extract and analyse user behaviour data and key metrics, assessing ROI, prioritising product enhancements, and aligning solutions with cross-functional teams including designers, developers, QA, UAT testers, and senior management
- Drive market buy-in for product solutions by addressing legal, anti-fraud, and cost concerns while ensuring product integrity, using data and strategic arguments to align regional needs
- Build 0-to-1 conversational chatbot to replace the notification admin portal as part of an AI-native pioneer team, currently in build and internal testing
- Co-designed lean AI-native team workflow with the engineer, replacing waterfall PRD/TD cycles with a daily plan-build-test loop, shipping visible features every day
- Led end-to-end Notification Page revamp from idea conception to delivery, grounding product decisions in data insights and integrating deep semantic similarity modelling to drive +34% to +85% uplift in promotional notification clicks and up to +2.01% GMV/U growth while maintaining stable engagement
- Launched a multi-tiered notification prompt system, increasing 'Allowed' permissions up to 5.13pp or ~7.29M users in a week while optimising prompt frequency for engagement and minimal spam sensitivity
- Spearhead the notification system setup for the new Seller app by aligning requirements across product lines, ensuring a seamless migration, reducing technical complexity through legacy system transitions, and advocating for long-term scalability in notification infrastructure
- Redesigned account switching and logout logic for cost-saving initiative (Outstanding Project Award), boosting adoption and reducing login OTP costs by up to 40.34%

User Experience Analyst at TikTok

May 2023 – Sep 2024

Skills: Data analysis, Insights generation, User feedback analysis, Project and people management, Policy Optimisation, Cross-Functional Collaboration

User Experience Analyst

- Delivered user insights to inform product decisions by combining statistical analysis and data visualisation with global user feedback across Trust & Safety and Privacy & Responsibility domains, validating hypotheses about user motivations and pain points while collaborating closely with product teams across different time zones
- Informed Watch History's new filter feature by analysing user motivations for utilising Watch History, such as revisiting recent videos or locating specific content, while testing hypotheses on filter options including time viewed, content type, and more. Data showed time viewed as the most significant factor, which guided the final filter design
- Shaped accessibility feature roadmap by identifying top-requested improvements from user feedback trends, such as caption customisation, which helped prioritise development efforts and guided early-stage product discussions
- Enhanced chatbot responses and FAQ content, reducing user feedback volume by ~45% for a specific topic and improving operational efficiency across global support teams
- Managed global user feedback infrastructure updates, including labelling setup and backend alignment; built and optimised dashboards and an alert system to automate issue tracking
- Awarded the spot bonus for "Role Model for Longterm Mindset"

User Experience Specialist

May 2023 – Oct 2023

- Analysed user feedback to ensure that issues are reported and to promote program optimisation and bug fixes
- Collaborated with external teams such as product and engineering teams to report, follow up and promote the resolution of product bugs in a timely manner
- Led a team of three in daily operations, including communicating changes, training new hires, and maintaining high morale—developing a training approach that was adopted by all other trainers in the department
- Optimised workflow problem resolution by updating the knowledge bank with the latest feature expectations, reducing second-time feedback by ~80%, and implementing a shared operational task tracker that eliminated 3–5 missed tasks daily

Business Consulting Intern at Flex-Solver

Dec 2021 – Jul 2022

Skills: Business process mapping and analysis, Stakeholder research and analysis, Workshop facilitation

- Partnered with a client in a Business Process Redesign Consultancy Project by mapping and analysing business processes to identify opportunities for streamlining and recommendations for change
- Researched stakeholder sentiments through focus group discussions and user journey map analysis, conducting interview with groups of external stakeholders to understand their pain points and gather suggestions
- Facilitated ideation workshops with internal stakeholders to define the vision for the organization's end state and create a timeline for the implementation of solutions
- Prepared documents such as Balance Scorecards, summary reports, flowcharts, etc, for the client

User Experience Intern at National Youth Council Singapore

Jun 2020 – Aug 2020

Skills: User research, Prototyping and development, Stakeholder presentation

- Supported the Transformation Office in designing and conducting deep user research using the Design Thinking methodology to propose recommendations for youth engagement to improve business work processes
- Worked alongside a group of interns on the prototyping and development of the “On My Way” mobile web application on Figma that aimed at bridging the gap between Singapore students and discovering their career ambitions
- Presented our suggestions, progress and concept that stemmed primary research to C-suite and director-level stakeholders

Marketing Operations Intern at Bamboo Builders

Feb 2020 – Mar 2020

Skills: Website design optimisation, Social media management

- Optimised website design for seamless user experience and tracked marketing KPIs and ensured timely updating of Social Media
